Contents

0	Integration theory	3
1	Finite Fourier Transform	10
1.1	Introduction	10
1.2	L^2 -Theory (“Energy theory”)	14
1.3	Convolutions (“Faltningar”)	21
1.4	Applications	31
1.4.1	Wirtinger’s Inequality	31
1.4.2	Weierstrass Approximation Theorem	32
1.4.3	Solution of Differential Equations	33
1.4.4	Solution of Partial Differential Equations	35
2	Fourier Integrals	36
2.1	L^1 -Theory	36
2.2	Rapidly Decaying Test Functions	43
2.3	L^2 -Theory for Fourier Integrals	45
2.4	An Inversion Theorem	48
2.5	Applications	52
2.5.1	The Poisson Summation Formula	52
2.5.2	Is $L^1(\widehat{\mathbb{R}}) = C_0(\mathbb{R})$?	53
2.5.3	The Euler-MacLauren Summation Formula	54
2.5.4	Schwartz inequality	55
2.5.5	Heisenberg’s Uncertainty Principle	55
2.5.6	Weierstrass’ Non-Differentiable Function	56
2.5.7	Differential Equations	59
2.5.8	Heat equation	63
2.5.9	Wave equation	64

3	Fourier Transforms of Distributions	67
3.1	What is a Measure?	67
3.2	What is a Distribution?	69
3.3	How to Interpret a Function as a Distribution?	71
3.4	Calculus with Distributions	73
3.5	The Fourier Transform of a Distribution	76
3.6	The Fourier Transform of a Derivative	77
3.7	Convolutions ("Faltningar")	79
3.8	Convergence in \mathcal{S}'	85
3.9	Distribution Solutions of ODE:s	87
3.10	The Support and Spectrum of a Distribution	89
3.11	Trigonometric Polynomials	93
3.12	Singular differential equations	95
4	Fourier Series	99
5	The Discrete Fourier Transform	102
5.1	Definitions	102
5.2	FFT=the Fast Fourier Transform	104
5.3	Computation of the Fourier Coefficients of a Periodic Function	107
5.4	Trigonometric Interpolation	113
5.5	Generating Functions	115
5.6	One-Sided Sequences	116
5.7	The Polynomial Interpretation of a Finite Sequence	118
5.8	Formal Power Series and Analytic Functions	119
5.9	Inversion of (Formal) Power Series	121
5.10	Multidimensional FFT	122
6	The Laplace Transform	124
6.1	General Remarks	124
6.2	The Standard Laplace Transform	125
6.3	The Connection with the Fourier Transform	126
6.4	The Laplace Transform of a Distribution	129
6.5	Discrete Time: Z -transform	130
6.6	Using Laguerre Functions and FFT to Compute Laplace Transforms	131
