

273018 Special Functions 2011

<u>I.</u>	<u>Introduction</u>	1
<u>II.</u>	<u>Γ-Functions and Relatives</u>	3
	1. Definition of $\Gamma(z)$	3
	2. The Beta-Function	8
	3. Properties of the Γ -function	10
	4. Stirling's Formula	13
	5. Incomplete B- and Γ -functions	13
<u>III</u>	<u>Solution of PDE's by separation of variables</u>	16
	1. A classical example	16
	2. The Helmholtz equation	22
	3. The Laplacian in cylindrical coordinates	23
	4. The Laplacian in spherical coord.	28
<u>IV</u>	<u>Series Solutions of ODE's</u>	
	1. Singular points	33
	2. Series solutions of ODE's	36
	3. Second order ODE's (review)	43
	4. A second solution to Bessel's eq.	46
<u>V.</u>	<u>Bessel Functions</u>	
	1. Repetition	49
	2. Recursion Formulas	49
	3. Generating Functions	51
	4. Positive zeros of Bessel functions	54
	5. Neuman Functions	59
	6. Hankel Functions	62
	7. The Generalized Bessel's Eq.	63
	8. Physical Applications	66
	9. Orthogonality of Bessel Functions	69

<u>VI</u>	<u>Orthogonal Function Expansions</u>	
1.	Introduction	73
2.	Inner Product Spaces	74
3.	Orthogonal Function Series	80
4.	Examples	86
5.	Heat Equation in a Cylinder	89
6.	Maueel Transformations	92
7.	Gram-Schmidt Orthogonalization	93

<u>VII</u>	<u>Legendre Polynomials</u>	
1.	Serial Solution of Legendre's differential equation	99
2.	Recursive Formulas	103
3.	Representation Formulas	106
4.	Orthogonality	109
5.	Fourier-Legendre series	110
6.	Best Norm Approximation	112
7.	A second solution to Legendre's eq.	113
8.	Associated Legendre Functions	114
9.	Spherical Harmonics	115
10.	Laplace Series	120

<u>VIII</u>	<u>Sturm-Liouville Theory</u>	
1.	The Adjoint Differential Operator	122
2.	Second Order Self-Adjoint Differential Equations	125
3.	Self-Adjoint Boundary Conditions	128
4.	Eigenvalues and Eigenfunctions	131
5.	An Infinite Interval and other Irregular problems	140
6.	Sequences of Orthogonal Polynomials	144
7.	Generalized Fourier Series for regular Sturm-Liouville	148

IX. Hermite Polynomials

1.	Serial Solution	153
2.	Recurrence Formulas & Generating Functions	156
3.	Representation Formula	158
4.	Orthogonality	159
5.	The Hermite Functions	161
6.	The Fourier transform on $(-\infty, \infty)$	162

X. Laguerre Polynomials

1.	Serial Solution	166
2.	Properties	168
3.	The Laguerre Functions	169
4.	Associated Laguerre Polynomials	171

XI. Chebyshev's Polynomials

1.	Serial Solution	173
2.	Chebyshev's Polynomials of the second kind	174
3.	Orthogonality	175
4.	Trigonometric Formulas	176
5.	Recursion Formulas etc.	179

— The End — 180
