

Lowest kidney cancer death rates

Fig. 2.4 The counties of the United States with the *lowest* 10% age-standardized death rates for cancer of kidney/ureter for U.S. white males, 1980-1989. Surprisingly, the pattern is somewhat similar to the map of the highest rates, shown in Fig. 2.3. Hand this map out to the students only after they have discussed the previous map.
